

TRS INTERLOCKING WALL CLADDING SYSTEM

PURPOSE

TRS Interlocking Panels are supplied for use as an external metal cladding system that is installed over a 20 mm drained and ventilated cavity system and as an internal lining that may be direct fixed or fixed on battens.

EXPLANATION

The panels are long-run metal sheets fabricated from:

- Vitor⁺, Vitor⁺zx or LUX (with base metal Copper
 - Stainless
- thickness of 0.55 g) Pre-painted Aluminium (0.8 mm thick)

The panels incorporate an interlocking groove that provide the appearance of a recessed joint. The panels may be installed horizontally or vertically.

Panel dimensions are as follows:

- > Length (maximum) (m): 4.0, and 6.0 (pre-painted steel only)
- Pan size (mm): 155 260

20

Variable 155-400mm
(Recommend 280mm max. - Consult with The Roofing Store)

> Stainless steel.

> Recommended negative joint size (mm): 15.

2mm min

> is coated in accordance with AS/NZS 2728.

For further assistance please contact: 0800 277 271 info@theroofingstore.co.nz www.theroofingstore.co.nz /^{25mm max}

TRS Interlocking Panels are available in a number of different colours and can also be finished to resemble rusticated weatherboards.

12.7-38.5 Adiu

SCOPE AND LIMITATIONS OF USE

Scope	Limitations
Location	
In all wind zones as defined in NZS 3604:2011 or up to a calculated wind design pressure of 2.5 kPa.	> Fixing to be in accordance with TRS Span Tables.
All exposure zones as defined in NZS 3604:2011.	> Where exposure zone D applies Vitor+ and Lux may not be used.
	> Where 'microclimatic conditions' (sec 4.2.4, NZS 3604:2011) apply, contact The Roofing Store for technical advice.
On buildings located any proximity to a relevant boundary.	> TRS Interlocking panels are non-combustible.
	The balance of the external wall (design & construction) must comply with the relevant fire provisions of the NZ building code.
Building	
On all building uses.	> Where material group 1 or greater is required.
	> All building heights subject to the limitations of the TRS span tables. The balance of the external wall (design & construction) must comply with the relevant fire provisions of the NZ building code.
In conjunction with a primary structure (timber or steel structural framing, or over structural panels) that complies with the NZ Building Code or where the designer has established that the existing structure is suitable for the intended building work.	> Where installed over steel framing and where part of an insulated building, a thermal break is required.
As an external wall.	> Must be installed over a drained and ventilated cavity
	> Where installed horizontally, castellated cavity battens are required.
	Flashings, flexible and rigid building underlays and TRS Interlocking Panel fixings must be in accordance with E2/AS1 and/or the NZMRM Code of Practice (V3.0).
	> Contact with other materials must be in accordance with E2/AS1 and NZMRM Code of Practice (V3.0).
As an internal lining	> Where material group 1 or greater is permitted.
	> The panel must be earthed where a power socket is installed in the panel or wires run behind it.
USEFUL INFORMATION	OTHER CERTIFICATIONS AND APPROVALS
For design, installation, maintenance and warranty information for the TRS Interlocking Panels, and for supply and manufacturing	KiwiColour as manufacturer of the coated steel product provide assurance that the steel:
information, and the statement made about s26 of the Building Act 2004,	> has been manufactured in accordance with AS:1397

refer to www.theroofingstore.co.nz.

PERFORMANCE CLAIMS

If designed, installed and maintained in accordance with all The Roofing Store requirements, TRS Interlocking Panels will comply with or contribute to compliance with the following performance claims:

NZ Building Code clauses	BASIS OF COMPLIANCE	
	Compliance statement	Demonstrated by
B1 Structure B1.3.1, B1.3.2, B1.3.3 (a, b, c, d, g, i)	ACCEPTABLE SOLUTION B1/AS1	 AS/NZS 1397:2011. AS/NZS 1170:2002 (for span tables). The Roofing Store. Wind uplift strength of interlocking claddings under static and cyclic wind loading. [n.d.]
B2 Durability B2.3.1 (b), B2.3.2 (b)	ACCEPTABLE SOLUTION B2/AS1	Coated in accordance with AS/NZS 2728:2013 cited in E2/AS1 which provides for profiled metal roofing and cladding solutions including the durability attributes of the building elements.
C3 Fire Affecting Areas Beyond the Fire Source C3.4 (a), C3.5, C3.7 (a)	ACCEPTABLE SOLUTION C/AS2	 Steel, Aluminium, S/Steel & Copper are non-combustible. Material Group 1S, Table A1, C/VM2.
E2 External Moisture E2.3.1, E2.3.2, E2.3.7 (a, b, c)	ALTERNATIVE SOLUTION	 > Generally in accordance with E2/AS1 > The Roofing Store. Weathertightness testing of the TRS interlocking panel claddings. [n.d]. > E2 Evaluation of wall cladding system demonstrates compliance with Clause E2 [TBB, 10/2022].
E3 Internal Moisture E3.3.4, E3.3.5, E3.3.6	ACCEPTABLE SOLUTION	 Metals are impervious to water. Where E3 applies, the panel is to be installed in accordance with E3/AS1.
F2 Hazardous Building Materials F2.3.1	ALTERNATIVE SOLUTION	 > Use in accordance with supplier's safety information. > Coating system is inert once dry.
G3 Food Preparation and Prevention of Contamination G3.3.2 (b)	ACCEPTABLE SOLUTION	> Para 2.2.3 requires that building elements and any joints in construction be impervious and easily cleaned. TRS Interlocking Panels meet this requirement.
