

Revolutionary
Pre-Painted Steel

LUXTM

LUX PRE-PAINTED STEEL

Lux is a revolutionary and unique new product that will change the way you approach building materials. Experience the strength, versatility and durability of pre-painted steel while enjoying the visual appearance of other materials such as wood, zinc, corten or fabric.

Lux consists of a steel base, with a zinc aluminium coating (45% zinc and 55% aluminium alloy) to a normal mass of 200g/m².

Lux utilises PVDF paint technology ensuring that it will withstand even the toughest of marine and industrial environments. The pre-painted and printed finishes are applied through a three bake process, further enhancing durability and corrosion resistance.

Lux has a full range of warranties available on all its products. Warranty periods are determined by the final application and location of the building; the environmental categories are described in AS/NZS 2728:2013.

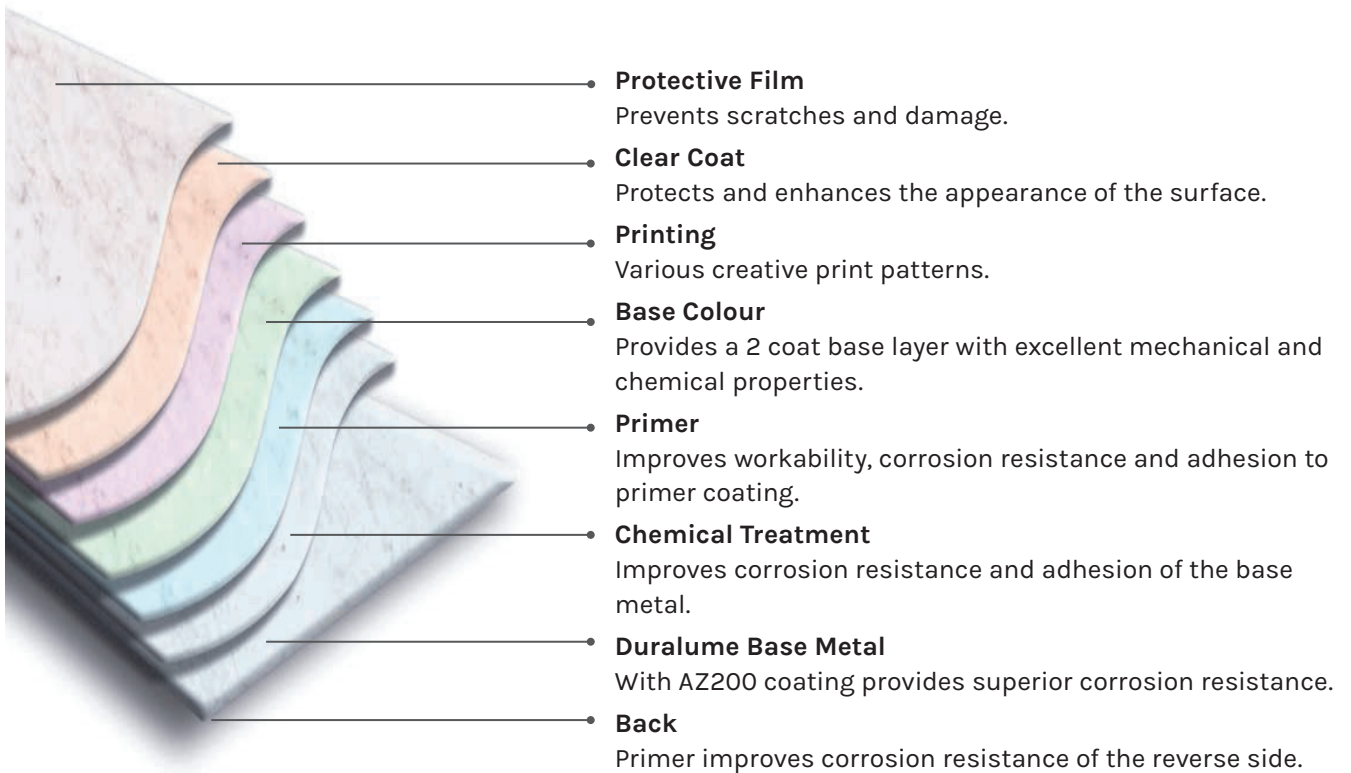

*All Lux is available in 0.55mm base metal thickness and it suitable for a wide range of architectural roofing, internal and external wall claddings, rainwater goods and general building usage.

ZINC

The simple yet timeless Zinc pattern replicates the natural look of pure zinc, making it ideal for smooth, polished interiors and exteriors.

Zinc Light

Zinc Dark

STONE

The Stone pattern replicates a textured and brushed sand appearance, offering another dimension and alternative to traditional lighter plain colour finishes.

Stone

FABRIC

This unique pattern has the appearance of soft, textured fabric, with a luxuriously smooth finish, perfect for interior or exterior cladding.
